

Agency User Guide

How to Resolve the Remarks of the Verifier

The ARTEMIS platform now features an improved remarks resolution process designed to support a smoother validation experience for users and verifiers. With this update, remarks left by verifiers can still be viewed and resolved even if the related section has been removed from the system. This guide will walk users through the process of accessing, reviewing, and resolving remarks to ensure accurate and timely completion of validation requirements.

Step 1: Scan through the services of your agency and identify the service for resolving of remarks (*verifiers may only resolve their own remarks, meaning Verifier #1 may not resolve the remarks left by Verifier #2*). You may utilize the search bar, the process owner dropdown, and other filtering options present in the worklist management page.

Step 2: Once the service for resolving of remarks is identified, kindly click the yellow “view service page” button

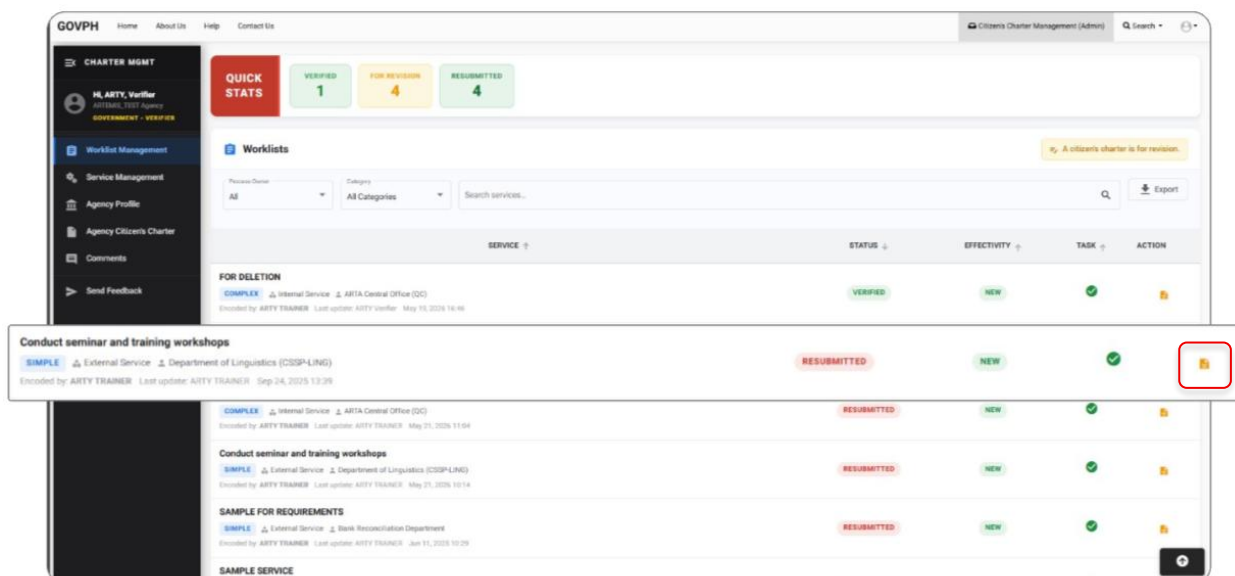

Fig 2 – “View Service Page” button

Step 3: The user will be redirected to the view service page, which contains the “details” button in the upper-right side of the screen. Clicking said button will trigger the appearance of the remarks side panel. You may refer to the screenshot below for the location of the button

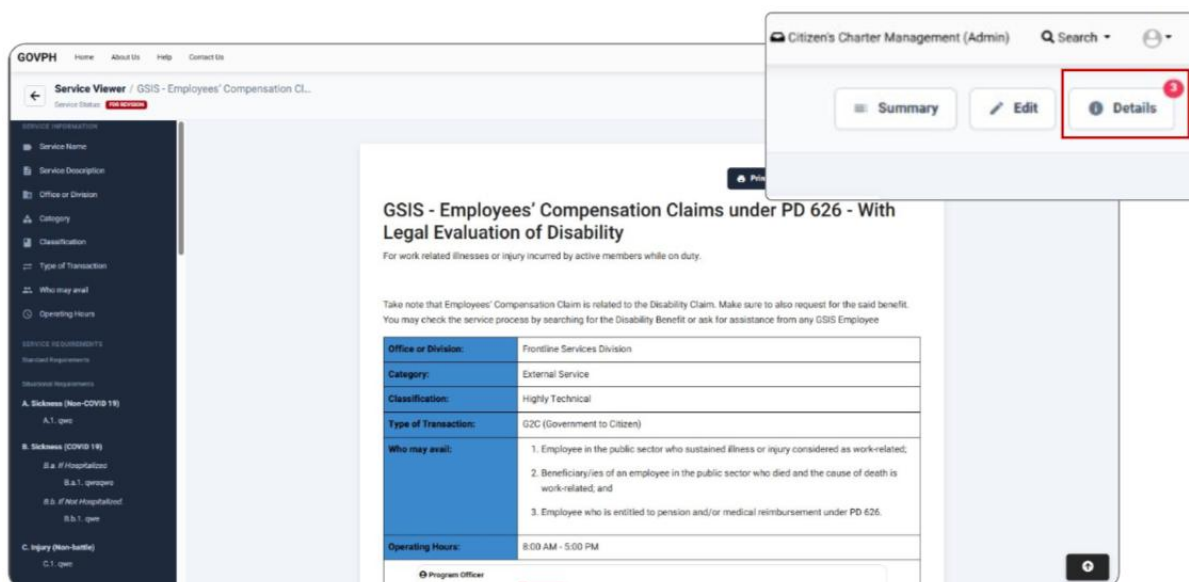

Fig 3 – Opening the Remarks Side Panel

Step 4: Once the remarks side panel is present, the verifier may review his/her remarks and resolve any remarks that has been complied by the encoder. The remarks left on sections of the service specifications table that has been removed by the encoder will still appear in the remarks side panel. A verifier may click the “Resolve all my remarks” button to clear all remarks or individually check and click the “resolve” button for each remark that has been encoded.
